

Remote Learning Plan

Marcia Inacio, Technology Specialist
Bureau of Curriculum & Instruction
Ministry of Education

I'M JUST WAITING

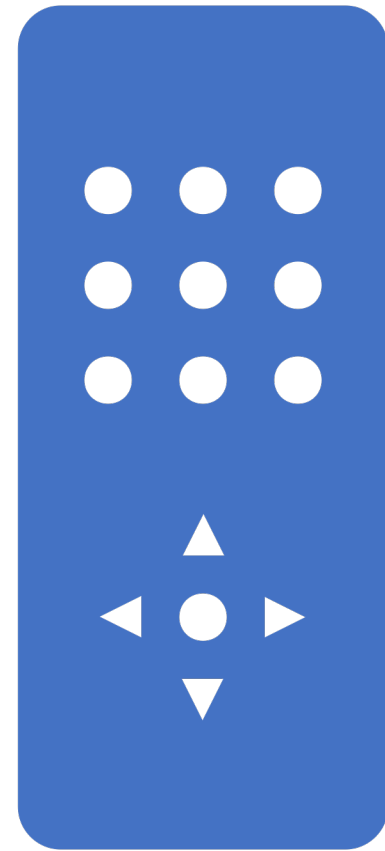

**FOR SOMEBODY TO
TELL ME GOOD MORNING**

**To put things in
perspective...**

WHY TIK TOK?

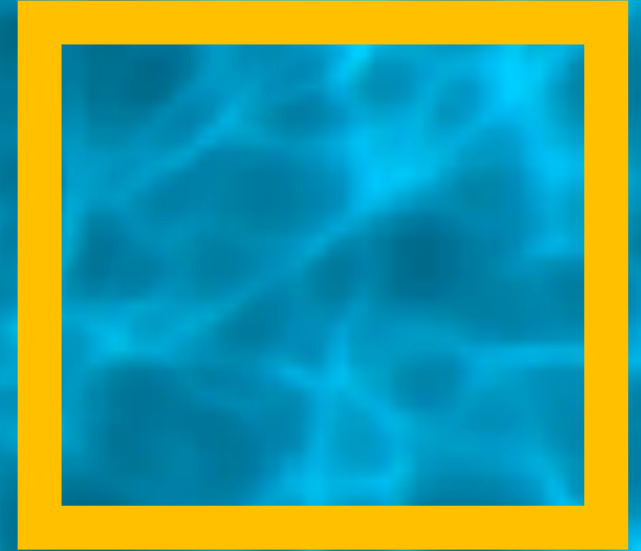

WHAT IS REMOTE
LEARNING?

WHY REMOTE LEARNING?

#CURRENT SITUATION

NEXT STEP

GOAL 1

**Train all
teachers**

GOAL 2

**Implement
Remote
(online)
teaching and
learning**

GOAL 3

**Provide
support and
follow up
trainings**

MOE REMOTE TEACHING & LEARNING PLATFORMS:

Achieve 3000-Comprehensive Online Differentiated Instruction

Zoom-Online Instructional Delivery

Edmodo-Online Classroom

Others-blended learning platforms allowing for both online and offline learning

Adaptive Measures & Risk Mitigation

Blended Learning Approach

With this approach, the goal is to provide reinforcement, support, and opportunity for collaboration through the platform of technology, while also using adaptive measures such as offline learning to mitigate challenges and issues with any instances of unstable online connections or lack of connectivity.

Digital Citizenship & Acceptable Use Policy

An important aspect of using technology tools and going online includes addressing responsible use of technology, being safe online, and the legal and ethical ramifications of being a digital citizen. In this regard, the Ministry of Education Acceptable Use Policies and Digital Citizenship standards and practices extends to homes along with the Ministry's issued devices to students. These policies and standards will be made known and shared with all parents by each respective school. The Ministry will further share with the public this information and urges the public, parents, guardians, and students to abide by the policies and practice good digital citizenship standards.

Safety Curriculum

9 themes of digital citizenship

Digital Divide & Equitable Access

The Ministry of Education further recognizes that this new approach to learning may have unintended implication in widening the gap in students' learning and progress due to level of support students receives at home with the use of technology and online learning.

CALL TO
ACTION

STAKEHOLDERS RESPONSIBILITIES

Do

What the Ministry will do

- equitable access, survey and assess need, outsource funding and support services

Do

What schools will do

- train teachers, implement remote learning, collaborate

Do

What parents will do

- awareness, involvement, and digital citizenship

Do

What community will do

- awareness and support

WAY
FORWARD

- **Inevitable Shift**
- **Buy in for all stakeholders**
- **Collaborative Effort**
- **National Agenda**
- **Digital Citizenship**
- **Invitation to join tech sessions**
